Law Department, Bangalore

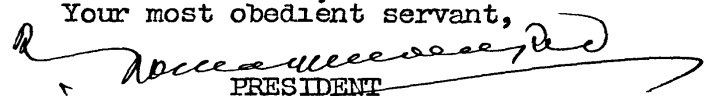

Sir,

Subject - Water-supply to Mysore City - Permanent and long
range improvements

I have the honour to state that a meeting of the Mysore City Water Supply Committee was held to-day in the City Municipal Office and the Committee generally approved of the alternative schemes recommended by the Sub-Committee and resolved to request the Chief Engineer for Irrigation, to kindly have estimates prepared The appointment of a Graduate Surveyor, for a period of six months for preparing estimates, was also approved The proceedings of the Committee will be placed before the Municipal Council Meeting very early and the Council Resolution in this behalf submitted to Government

In the meanwhile, a copy of the proceedings of to-day's meeting, together with a copy of the Sub-Committee proceedings is herewith forwarded for the kind information of Government and early sanction to appoint the Graduate Surveyor

In this connection, I request that orders of Government regarding the proposals for immediate improvements, may kindly be communicated very early

I have the honour to be,
Sir,
Your most obedient servant,

PRESIDENT

SNR

--

The proposals sent by the Sub Committee for consideration
of permanent and long range improvements were discussed in detail
The Committee accepts generally the alternative schemes recommended
by the Sub Committee providing for a daily consumption of not less
than 12 M G of water and resolves that the Chief Engineer for
Irrigation may be requested to kindly have estimates prepared in
respect of the several items for the alternative schemes for
consideration and expression of final opinion by this Committee

Resolved further, that for the expeditious preparation of
these estimates, Government be requested to sanction the appoint-
ment of a graduate surveyor for a period of six months

Sd R Ramachandra Rao Bhombore,
President

"Copy"

President

In the above scheme the source of water is the Devraj Channel (irrigation) as at present. If the water has to be drawn directly from F.R.S. to be sure of less contamination an M.C. Duct from K.R.S. to Melagola will have to be laid

An alternative may also be worked out for the entire plant of pumping and filtration being installed at K.R.S. and suitable mains laid direct to High level and Service Reservoirs.

Messrs

1. M. Narasingaiya, B.A., C.E., M.I.E., (Chairman)
2. P. Parathasarathy, L.M.S., B.Sc., etc.,
Director of Public Health in Mysore
3. C.N. Shama Rao, B.A.M.E., Executive Engineer, Water Supply Division, Bangalore
4. K.S. Venkataramanan, B.A., B.E., Sanitary Engineer,
5. I. Venkataramiah, Vice President, City Municipal Council, Mysore
6. K.V.G. Dwajan, B.E., Superintendent, Vani Vilas Water works, Mysore. (Secretary)

Members Absent.

N I L

After a detailed discussion for about 2½ hours, the following resolutions were passed

1. The Probable population in 1961 was estimated at 4 lakhs basing the same as the increase during the decennial 31-41 which was 40% and on a tendency for a large increase also.

It was considered enough if the improvements now proposed were adequate for 20 years. The daily consumption of water was fixed at 12 m.g. assuming 30 gallons per head, per day, which was considered by the Director of Public Health as the lowest standard

The permanent improvements scheme was proposed to be prepared on this basis and so designed as to be capable of expansion periodically as the necessity may arise but well in advance, say, in 5 years at a time.

Scheme:

- (a) The present capacity of the pumping plant is 4.5 m.g. a day. Three pumping units of a capacity of 3 m.g. per day to be installed in the first instance and one later
- (b) A 27" main in addition to the present mains to be laid
- (c) Remodelling the existing sedimentation tanks from 4.5 to 12 m.g.d.
- (d) 8 units of filters of 1 m.g. per day to be erected 4 units in the first instance and 4 later
- (e) The storage capacity at H.L.R. to be increased by 2½ m.g. the capacity of pumping units at the filter-house being increased suitably.
- (f) The storage of 1 m.g. at L.L.R. to be increased by 6.5 m.g. - 4 m.g. in the first instance and 2.5 m.g. later on.
